## Column Construction Reinvented

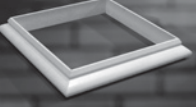

- n With Royal Wood Column Wrap, turning a treated post into a finished column that will last a life time can be accomplished in just minutes. Our patent pending snap design allows for one person installation and the PVC construction means a life time without repairs or maintenance.
- n Simply apply PVC adhesive to each groove engineered into the column wrap, place the wrap around a treated post and snap the ends together. Once the glue sets up (24 hour period recommended), temporary tape is removed from each corner and the project is complete.
