

Screen Porch Planning Worksheet

1 square : 1 foot | See Page 2 for Blank Grid

Sketch an elevation of each side of your porch. Note the horizontals and verticals. How many verticals are above the rail? How many are below?
Note posts and rail sizes – 4x4 or 2x4. Depending on your screening system of choice, the exact materials and components will vary.

Blank grid area for sketching porch elevations.

Screen Porch Planning Worksheet

1 square : 1 foot

A large grid for planning a screen porch. The grid is 42 squares wide and 25 squares high. In the top right corner, there are labels: "<< 42-ft" at the top, "25-ft" on the right side, and ">>" at the bottom right. The grid is intended for drawing a screen porch layout, where each square represents one square foot.
