

PVC Screen Wall System

Homeowner Pricing

Screen Wall is the only PVC porch framing and screening system on the market. Comprised of rigid vinyl and reinforced with fiber composites, Screen Wall consists of heavy-duty components that are incredibly durable, low-maintenance and resistant to extreme wind and weather.

Additional Details

- Broken box charge of \$20 per order applies when ordering less than box quantity stated above.
- Extended lengths (over 8 feet) are subject to additional shipping charges.
- 3/4 in screws are for pickets and fastening the angle brackets to posts. 2 in screws attach the perimeter components to the existing porch structure. You'll need 12 screws for each 8ft length.
- The posts attach to the perimeter and other posts using the angle brackets and 3/4-in screws.
- Pickets are optional. For each picket, you will need 2 picket brackets and 4 3/4-in screws.
- Each angle bracket requires 4 screws. For each post that meets a perimeter, you will need 2 brackets. For each vertical post that intersects a horizontal post, you will need 4 brackets.
- The beauty cap inserts into the channels of posts and perimeter to cover all angle brackets and screws. Each post has two channels. For each 8 ft post, you will need 2 beauty caps. The perimeter component has a single channel. For each 8 ft perimeter, you only need one beauty cap.
