Available in white,
black or dark bronze!

✓ Multiple Mounting Options

MultiTrack is several systems in one—choose surface mount or interior mount based on your porch design.

Multiple caps to mount on the surface or on the interior of your porch structure.

✓ Hidden Fasteners

MultiTrack caps hide all screws and provides the clean look Screen Tight has become known for.

✓ Spline Optional

Use the MultiTrack side cap to hold the screen without spline or surface mount with round spline.

MultiTrack vs. the Competition

	MultiTrack	Competition
Installation Methods	 Surface mount or interior mount. Spline or no-spline.	 One fixed method, limited configuration flexibility
Fastener Visibility	 Snap-on caps hide all screws completely	 Screws visible on clunky plinth kits
Architectural Flexibility	 Adapts to columns, trim and unique configurations	 Best suited for standard rectangular openings
Material & Components	 All components made of durable, long-lasting vinyl	 Components made of PVC and heavy aluminum
Corner Handling	 Built-in corner system, no mitering required	 Requires miter cuts or separately purchased plinths
User Range & Complexity	 Designed for DIYers and professional builders	 Steeper learning curve, harder for DIYers
Screen Repair & Replacement	 Cap removes easily for fast screen swaps	 Cap removal requires wedge tool to release
Track Size & Appearance	 Sleek 2" x 1" track, minimal visual footprint	 Bulkier profile interrupts sightlines and views
Product Availability	 One track system handles any size or scope	 Larger panels require special freight ordering
